

Eligibility

Amberwell Health at Home accepts Medicare, Medicaid, and many other private insurance plans.

MEDICAID & PRIVATE INSURANCE

Coverage varies per policy. Verification of benefits is required to begin care.

MEDICARE PART A

Typically, Medicare Part A policies cover 100% of the cost of home health. However, verification of benefits is required to begin care.

QUALIFICATION APPOINTMENT

Patients can qualify for insurance coverage if their physician prescribes in home care after a face-to-face appointment.

If a patient is homebound, there are options to qualify for insurance-covered services through an in-home appointment.

QUESTIONS

We welcome questions via phone. Please call 913-360-5520 to speak to a representative with Amberwell Health at Home.

Tailored Care — *Wherever you call home*

We are here to provide the care you need, whether home health or hospice, wherever you call home.

Amberwell Health at Home serves the Atchison community as well as the surrounding counties of Brown, Doniphan, Jackson, Jefferson, and Leavenworth counties.

Home Health Care

We work closely with you and your doctors to determine the best plan and treatments to help regain and/or maintain your health.

SKILLED NURSING

Nurses provide wound care, IV infusion therapy, pain management, medication management, breathing care, and more. Nurses also educate you and your loved ones about your illness and how to best keep your symptoms under control.

PHYSICAL THERAPY

Therapists provide treatments and exercises to help you achieve more mobility. Therapists focus on your safety, pain management, and independence while promoting your balance, flexibility, and strength.

OCCUPATIONAL THERAPY

Therapists help improve your ability to perform tasks in living and work environments. They can help you improve basic motor functions or find ways to help you compensate for loss of abilities after injury or stroke.

SPEECH THERAPY

Therapists treat speech, voice, swallowing disorders, and hearing issues that may affect eating or communication.

HOME HEALTH AIDES

Certified nurse aides give you assistance with personal care, bathing, and help your health care team monitor your condition.

MEDICAL SOCIAL WORKERS

Social workers help find community resources to keep you safe at home, make your long-term plans, as well as find you assistance with financial matters.

Hospice

Hospice focuses on helping you live every day with comfort and dignity. Our team is here neither to prolong life nor hastens death, but to improve your quality of life while managing symptoms from life-limiting illnesses and chronic diseases.

YOUR TEAM

Your specially-trained team works together to manage and control pain and other physical symptoms. Your team includes your doctor, nurses, social workers, chaplains, nurse aides, volunteers, medical director, and your loved ones.

YOUR LOVED ONES

Your team works closely with you and your family to develop a plan of care for your physical, emotional, and spiritual needs.

INFUSING JOY

Special events and activities are planned for patients by your hospice team to bring joy into your time in hospice.
